

# Hi there 🙋, I'm Wenhan Yu

---

[查看中文主页](#)

🎓 Student @ **Beihang University (BUAA)**

📖 Major in **Information and Computing Science** (Strong Foundation Program)

🏫 School of Artificial Intelligence

🔬 Researcher in the **Language Computing and Sequence Analysis Group**, led by Prof. [Sha Lei](#)

---

## 🔍 About Me

- 🙋 I'm passionate about **large language models (LLMs)** and their practical applications in\*\* vertical domains\*\*.
  - 🔬 Under the supervision of Prof. **Sha Lei**, I focus on model deployment, real-world application, and performance enhancement.
  - 💡 My research interests include **natural language processing (NLP)**, **multimodal learning**, **foundation model optimization**, and **efficient inference**.
  - 🌱 I am continuously improving my skills in **deep learning**, **model compression**, and **AI system engineering**.
- 

## 🧠 Research & Projects

- 📄 Research Internship @ [Language Computing & Sequence Analysis Group](#)
- 💻 **Participated / Completed / Ongoing Projects:**
  - 🔗 [LawLLM-cupl-buaa](#): A collaborative effort to build legal large language models and explore their applications.
  - 🔗 [LawDual-Bench](#): A bilingual benchmark dataset and evaluation framework for the legal domain, supporting multi-task evaluation.
  - 🔗 [KG\\_TCM](#): Construction and application of a knowledge graph for traditional Chinese medicine, focusing on structured information extraction.
  - 🔗 [BUAA-Image-processing-and-stylization](#): An experimental project on image processing and style transfer tasks.

## LawLLM-cupl-buaa

由中国政法大学和北京航空航天大学共同设计  
基于GLM-9B的法律文书处理和判决预测模型

● Python ☆ 24 🍷 2

## LawDual-Bench

LawDual-Bench is the first dual-task legal benchmark  
focused on Chinese insider trading cases, integrating  
structured information extraction and judgment prediction...

● Python ☆ 1

## KG\_TCM

北京航空航天大学人工智能学院2025知识图谱大作业  
通过爬虫和LLM协作  
构建了一个中医药的知识图谱

● Python ☆ 1

## BUAA-Image-processing-and-stylizati...

现在美图秀秀已经成为了很多人编辑图片的选择  
其由于简单易上手的特性与多样化的编辑操作广受欢迎。在这个作  
我们希望实现一个基础版的“美图”...

● Python ☆ 5
